Product description

Sportsmaster CRF contains a combination of controlled release fertilizer technology with compound granular fertilizers. This controlled release technology leads to regular growth without growth peaks. The uncoated portion of this fertilizer allows an immediate response of the turf.

Product advantages

1. The best preparation for winter gives a full, green sward in spring.
2. Controlled release nitrogen only released in conditions favorable to turf grass growth therefore helping to pre-stress condition the plant.
3. High potassium content strengthens cell walls and aids water regulation in plant.
4. The grass plant is more resistant to extremes of temperature.
