

# Looking closer pays off: The TEKU® AddedValues of the **container series MCO.**

# TEKU® Container Series MCO: Why a lot of small details are no longer just small details.

**“ A container is just a container?”  
Not with Pöppelmann TEKU®:  
discover TEKU® AddedValues.**

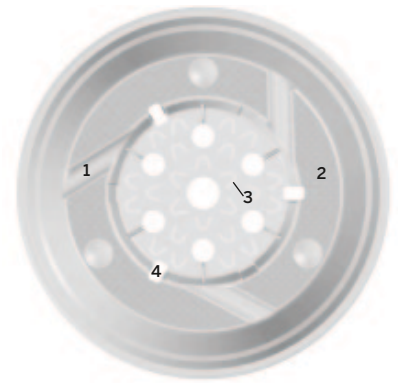

Fast watering and drainage and perfect transparency - these small details are often what makes a big difference. In other words: precision work. This is a decisive factor for the quality of the Container Series MCO.

And it's the decisive factor for something else: your success.

How TEKU® AddedValues benefit you: **Better plants** – more than 30 years of horticultural experience. **Maximum efficiency** – the plastics technology know-how of Pöppelmann engineers and production on modern high-

performance machines. **Effective sustainability** – management of environmentally-friendly materials.

On the following pages you can learn more – discover the details of TEKU® AddedValues.

## Graduated base

1. Asymmetrical drainage channels: the best possible drainage, improved stability on mesh surfaces.
2. Specially-designed base: optimum stability on mobile benches.
3. Patented plant tabs: secure attachment of the plant support.
4. Side slits and domed holes: balanced air/moisture ratio.

## Your advantages:

The high transparency ensures rapid growth and healthy plants. The high feet feature of the special bottom design makes this container well suited for the usage on mesh wire benches.

# More advantages for you all round: Benefit from **TEKU® AddedValues** every day with the container series MCO.

## Better Plants.

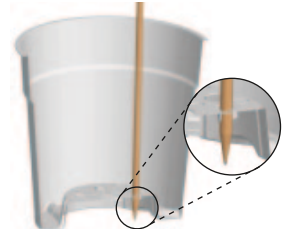

### Reduced cultivation time

The multi hole star bottom ensures rapid growth and healthy plants with ideal watering and drainage.

### Optimal root growth

A high transparency allows a optimal root grows, especially with phalaenopsis.

### Very low failure rates

Patented support tabs fix the plant supports securely in place and hold them straight, and providing a perfect hold for the Orchid panicles.

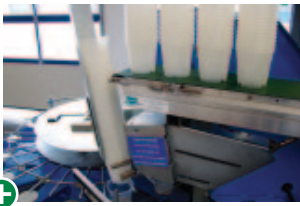

## Maximum Efficiency.

### Easily stacked

Stacking is possible due to the special stacking ridges on the outside.

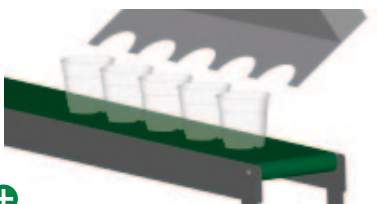

### Easy denesting from the stack

The distinctive pot rim ensure easy denesting from the stack in the pot magazine.

### Maximum stability

The asymmetrical water channels in the bottom design makes this container well suited for stability on mesh wire benches. Specially-designed base for optimum stability on mobile benches.

### Better handling

Destinctive rim for modern automatic pot handling machines.

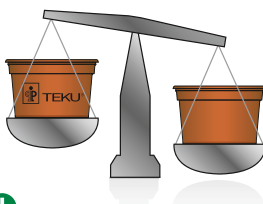

### Improved use of space

Efficient use of space due to the flat rim of the pot.

## Effective Sustainability.

### Reduced weight

Unrivalled low materials usage thanks to continuous design optimisation.
