## Sportsmaster® WSF

**HIGH P 16-32-16+0.015 Zn**

16+14.0+13.3+Zn

New packaging Q2 2012

### Product description

Sportsmaster WSF is a premium fertilizer with TMax technology for enhanced foliar and root nutrient uptake. Ideal for use on sports fields and fairways to compliment the main granular fertilizer programme.

### Product advantages

1. High P content with balanced N and K is ideal for over-seeding renovation work.
2. The high P to NK ratio encourages strong root growth and seed establishment.
3. Chelated Zinc avoids deficiencies normally caused by high phosphorus inputs and enhances turf health during seed establishment.

### Directions for use

- Sportsmaster WSF products are tank-mixable with other products within the range and H<sub>2</sub>Pro & H<sub>2</sub>Pro Maximise wetting agents.
- To ensure that this product dissolves completely: all products should be mixed by adding quantity required to a half full spray tank and agitating for 10-15 minutes. Bring to total volume with water. Water temperature will affect dissolution rate.
- Avoid applications during frosty or drought conditions.
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimize spray drift.
- The water volume used to apply Sportsmaster WSF will affect how nutrients are taken up by the plant.
- For foliar applications use low water volumes (300-600 L/Ha) and to optimize uptake avoid high temperatures and sunny conditions.
- For root uptake applications use high water volumes (600-1000 L/Ha) and follow immediately with a minimum of 2-3 minutes irrigation to provide the necessary water volume and to reduce the risk of turf injury.

### Storage

Store in original container. Keep at temperatures above 0°C. Keep away from food, drink and animal feeding stuffs. In crystalline form, enhances combustibility of other substances. Keep from drying out. Protect from contamination.
